

CRM DashBoard

Dataset Contains

- **Accounts & Customers** → Company info, customer IDs, regions.
- **Products & Sales Pipeline** → Leads, opportunities, closed deals, estimated values.
- **Sales Teams** → Assigned reps, conversion stages.
- **Customer Support Text** → Sentiment labels (positive, neutral, negative) for tickets and feedback.

Measure	Formula	Business Meaning
Total Revenue	TotalRevenue = SUM(accounts[revenue])	Overall account revenue.
Average Deal Value	AvgDealValue = AVERAGE(sales_pipeline[close_value])	Typical opportunity size.
Total Closed Deals	ClosedDeals = CALCULATE(COUNTROWS(sales_pipeline), sales_pipeline[deal_stage] = "Closed Won")	Number of successful deals.
Conversion Rate	ConversionRate = DIVIDE([ClosedDeals], COUNTROWS(sales_pipeline), 0)	% of opportunities converted.
Revenue by Product	RevenueByProduct = SUMX(sales_pipeline, sales_pipeline[close_value])	Sales contribution per product.

Column	Formula	Purpose
Deal Duration Days	DealDuration = DATEDIFF(sales_pipeline[engage_date], sales_pipeline[close_date], DAY)	Sales cycle length.
High Value Deal Flag	HighValueFlag = IF(sales_pipeline[close_value] > 50000, 1, 0)	Identifies big deals.

Account Age $\text{AccountAge} = \text{YEAR}(\text{TODAY}()) - \text{accounts}[\text{year_established}]$

Years since
account
creation.

CRM Dashboard KPIs

- **Conversion Rate KPI** → % of opportunities closed successfully.
- **Average Sales Cycle KPI** → Avg DealDuration.
- **Revenue by Product KPI** → Contribution of each product line.
- **Regional Revenue KPI** → $\text{SUM}(\text{accounts}[\text{revenue}])$ grouped by office_location.
